

Achieve Full Visibility with Barreleye Tracking

Barreleye Tracking offers unparalleled capabilities for accurate and efficient water monitoring, designed to solve your most pressing pain points. With features like the Online/Offline Mobile App, In-Field Data Capture, Actuals Management, and Innovative Reporting, our tracking application ensures precise data collection, real-time monitoring, and comprehensive reporting. Say goodbye to manual errors and inefficiencies. Maintain regulatory compliance, streamline operations, and ensure complete transparency with Barreleye Tracking. Experience seamless integration and enhanced operational efficiency, allowing you to focus on what truly matters—optimizing your water management strategy and driving success.

Track with Precision

Report with Confidence

1 Innovative Reporting Features

- Compliance assured
- Innovative & flexible reports
- Complete data integration
- Visual representation of data
- Auto upload for instant reporting

2 Advanced Tracking Capabilities

- Real-time water use tracking
- Eliminate manual written logs
- Mobile app for in-field data capture
- Operates without cell reception
- Quick and easy onboarding & setup

Advanced Features for Enhanced Efficiency

Transform Your Water Tracking

REAL-TIME DATA ACCURACY

Achieve unmatched precision with Barreleye Tracking's advanced Actuals Management. Centralize all water usage data into a single source of truth, ensuring precise tracking and reporting for better decision-making and regulatory compliance. This solution addresses the challenge of managing multiple data points by integrating all information in one place. Save time, eliminate errors, and streamline compliance, regulatory reports, and ESG metric tracking with ease.

EFFICIENT IN-FIELD DATA CAPTURE

Empower your field operations with our cutting-edge mobile app for real-time water data capture. Say goodbye to outdated processes that slow you down and cause errors. Record water movements instantly, eliminating manual mistakes and ensuring accurate, up-to-date data. The automatic upload to the desktop application allows for immediate tracking and reporting. Keep your tracking in-house and streamline your operations without relying on third-party vendors.

INNOVATIVE REPORTING TOOLS

Barreleye Tracking addresses the industry's lack of standardized processes for water reporting, crucial amid growing regulatory demands. Our innovative tools offer complete, customizable options, allowing you to visualize data in meaningful ways. Maintain compliance and make informed decisions with tailored reports. Stand out from competitors and lead the industry with enhanced transparency and accountability.
